

Dr. Ikroop Khazanewala, PsyD, earned her Doctoral and Master's degrees in Clinical Psychology from Midwestern University. She has worked and trained in many different settings including community mental health, private practice, hospitals, and universities. She has received specialized training in trauma-informed care and providing comprehensive psychological assessments to all ages.

Dr. Devyn Mares is a School Psychologist who completed her graduate training through The Chicago School of Professional Psychology. Dr. Mares has worked in school settings since 2014 providing psychoeducational assessments to students ages 3 to 22 to determine eligibility for services. Since transitioning to clinical practice, Dr. Mares has also provided assessment services to clients across a broader age range and has extensive experience working with neurodivergent clients including diagnoses of Autism and ADHD.

Dr. Helen Do, PsyD is a licensed clinical professional counselor (LCPC) and an experienced psychometrist. Dr. Do has an extensive background in neuropsychological, psychoeducational evaluations, as well as counseling. Dr. Do has counseling and assessment experience with ADHD, Autism, various mood disorders, and behavioral and emotional concerns, having the opportunity to work with children, adolescents, adults, and families in a variety of settings including schools, outpatient private practices, community mental health centers, a foster care agency, and a hospital inpatient program.

The psychologists at Pathways are a frequently sought after referral source for psychiatrists, physicians, schools, educational advocates, counselors, case managers and parents to assist with clarifying diagnoses and guiding treatment approaches. Pathways Psychology Services has become a reliable and trusted sourced for psychological and neuropsychological assessment in the Chicagoland area.

NEUROPSYCHOLOGICAL AND PSYCHOLOGICAL TESTING

- **ADHD Assessment**
- **Autism Spectrum**
- **Cognitive Functioning**
- **Diagnostic Clarification**
- **Learning Disability**
- **Treatment Guidance**

REASONS FOR TESTING:

- Clarify the nature of the behavioral, cognitive, or emotional problems
- Provide a more objective diagnostic approach to making a diagnosis
- Distinguish the nature of academic and learning challenges and inform school planning
- Identify strengths and weaknesses relevant to treatment planning
- Aid in the guidance of treatment, medication decisions, appropriate therapies, school accommodations, interventions, and counseling approaches
- Provide evidence for the necessity of support services, school interventions, accommodations, and allowances

OUR REPORTS ARE:

- Comprehensive, useful, and helpful
- Relevant and individualized
- Completed in a timely manner
- Billed under insurance in most instances
- Completed by psychologists who also provide individual, family, and group therapy thereby allowing for the incorporation of experience in ongoing treatment with qualified test and data interpretation
- Research-based assessment tools and the most up-to-date standardized testing tools available

PROBLEMS ADDRESSED:

- School Performance issues and learning problems
- ADHD
- Autism Spectrum Disorder
- Clarification of mood and anxiety disorders
- Complex symptom presentation
- Change/decline in mental functioning
- Evidence for disability
- Behavioral problems
- School and college accommodations
- Lack of progress in services
